Christian Luciani

Assignment 3 Analysis Document

1. My partner was Ben Broadhead. He's submitting our source code.
2. My partner and I switched roles every half hour or so. I would have liked to switch less often personally, as you seem to get into the swing of things and then it's time to switch.
3. I really like working with Ben, he puts up with my nonsense and makes me think. We'll be working together again.
4. Using the list would have been easier as we wouldn't have had to deal with the intricacies of arrays, but it would have made the program a lot slower as we would have to iterate over the whole list no matter what, instead of being able to just get a single item out of an array.
5. I wouldn't expect it to change very much. Changing the values doesn't make that big of a difference with a binary search.

7.

8. I spent 8 hours on this assignment.
